

I work night shift. 11pm to 7am. This law is the best thing to happen to those of us that sleep during the day. My phone has stopped ringing while I am trying to sleep. How would telemarketers like it if I was to call them while they were trying to sleep to sell them something? Indiana has done a good thing with this law. I have 100 co-workers (also voters) that would agree. Thankyou.
